Chapter 1 Introduction	
1.1 Background	1-1
1.2 The Applicant	1-1
1.3 Exploratory Block AA – ONN-2004/4 in Assam	1-2
1.3.1 General Information	1-2
1.3.2 Location and Geographical Information of the Block	1-4
1.4 Legal and Other Requirements	1-4
1.5 Scope of EIA Study	1-5
1.6 Approach & Methodology of EIA Study	1-6
1.6.1 Approach of the EIA Study	1-6
1.6.2 Establishment of Baseline Environmental Status	1-6
1.6.3 Field Study/Monitoring for Generation of Primary Data	1-6
1.6.4 Environmental Impact Assessment	1-7
1.6.5 Preparation of Environmental Management Plan	1-7
1.6.6 Preparation of Risk Assessment and Disaster Management Plan	1-7
1.7 Structure of the Report	1-8
Chapter 2 Project Description	
2.1 Key Block Information	2-1
2.2 Well Objectives	2-1
2.3 Prior to Drilling	2-1
2.3.1 Site Survey	2-1
2.3.2 Road and Site Construction	2-2
2.4 The Exploratory Drilling Operation	2-2
2.4.1 Components of Drilling Rig	2-2
2.4.2 Well Construction	2-6
2.4.3 Drilling Fluids	2-6
2.4.4 Cementing Program	2-10
2.4.5 Well Evaluation	2-10
2.4.6 Completion of Drilling	2-11
2.4.7 Rig Demobilization	2-11
2.4.8 Restoration and Rehabilitation	2-11
2.4.9 Staffing	2-12
2.4.10 Supplies during Well Drilling	2-12
2.4.11 Waste Streams	2-13
2.4.12 Noise, Air Emissions, Effluents, and Solid Waste Generation	2-14
2.4.13 Total Project Cost	2-15
Chapter 3. The Existing Environment	
3.1 Introduction	3-1
3.1.1 Project Location	3-1
3.2 Climate and Meteorology	3-1
3.2.1 Climate	3-1
3.2.2 Temperature	3-2
3.2.3 Meteorology	3-2

3.3	Air Environment	3-2
3.3.1	Ambient Air Quality Monitoring	3-2
3.3.1.1	Ambient Air Quality Monitoring Stations	3-2
3.3.1.2	Parameters, Frequency and Monitoring Methodology	3-3
3.3.1.3	Monitoring Results	3-4
3.3.2	Ambient Air Quality in the Study Area	3-4
3.3.2.1	Suspended Particulate Matter (SPM)	3-4
3.3.2.2	Respirable Particulate Matter (RPM)	3-5
3.3.2.3	Sulphur Dioxide (SO ₂)	3-5
3.3.2.4	Oxides of Nitrogen (NO _x)	3-6
3.3.2.5	Hydrocarbons (HC)	3-6
3.3.2.6	Volatile Organic Compounds (VOCs)	3-6
3.4	Water Environment	3-6
3.4.1	Water Quality Monitoring	3-6
3.4.1.1	Water Quality Monitoring Locations	3-6
3.4.1.2	Frequency & Methodology of Water Quality Monitoring	3-7
3.4.1.3	Monitoring Results	3-9
	i) Surface water quality in the Study Area	3-9
	ii) Ground Water Quality Monitoring	3-9
3.5	Land Environment	3-9
3.5.1	Physio-Chemical Characteristics of Soil	3-9
3.5.2	Conclusion from Soil Analysis	3-11
3.5.3	Land use pattern	3-11
3.5.4	Satellite data-Records	3-12
3.6	Noise Environment	3-14
3.6.1	Major sources of noise in the study area	3-14
3.6.2	Ambient Noise Monitoring	3-14
3.6.2.1	Noise Monitoring Locations	3-14
3.6.3	Analysis of the Data	3-15
3.7	Biological Environment	3-15
3.7.1	Floristic Composition	3-16
3.7.2	Agriculture and Agronomy	3-16
3.7.3	Tree Species	3-16
3.7.4	Mammals	3-17
3.7.5	Avifauna	3-18
3.8	The Socio-Economic Environment	3-20
3.8.1	Demographic Aspect	3-20
3.8.2	Household Size	3-21
3.8.3	Literacy and Educational level	3-21
3.8.4	Occupational structure	3-22
3.8.5	Livestock and Pisciculture	3-22
3.8.6	Textile and Handicrafts	3-22
3.8.7	Sericulture	3-22
3.8.8	Amenities and Infrastructural facilities	3-22
Chapter 4	Assessment of Impacts	
4.1	Assessment of Impacts on the Environment	4-1
4.2	Identification of Interactions	4-2

4.3	The Major Activities that may have Impact on Environment	4-3
4.4	Assessment of Impacts and Control Measures	4-3
4.4.1	Physical Presence	4-3
4.4.2	Noise and Vibration	4-4
4.4.3	Air Environment	4-5
4.4.4	Water Environment	4-8
4.4.5	Land Environment	4-9
4.4.6	Socio-Economic Environment	4-10
Chapter 5	Environment Monitoring Plan	5-1to5-7
Chapter 6	Risk Assessment & Disaster Management Plan	
6.1	Introduction	6-1
6.2	Consequence Analysis of Hazards	6-1
	A] Fires and Explosions	6-1
	B] Impact and Collisions	6-1
	C] Loss of Station-keeping/Loss of Stability	6-1
	D] External Hazards	6-1
6.2.1	Blowouts during Drilling / Testing Operations	6-2
6.2.1.1	Causes of Drilling Blowouts	6-2
6.2.1.2	Causes of Production Blowouts	6-2
6.2.1.3	Blowouts due to External Causes	6-2
6.2.1.4	Blowout Frequencies	6-2
6.2.1.5	Blow-out Frequencies Based on Phase of Operation	6-4
6.2.1.6	Blow-out Frequencies Based on Fluid Released	6-4
6.2.1.7	Blowouts in Individual Drilling Operations	6-5
6.2.1.8	Blowouts in Individual Wells	6-7
6.2.1.9	Thermal Radiations due to Blow-out – Jet Fire	6-7
6.2.2	Well Head Facilities	6-7
6.2.2.1	Hydrocarbon Leaks during Well Testing	6-7
6.2.2.2	Non-Process Hydrocarbon Fires	6-9
6.2.2.3	Structural Failures	6-10
6.2.3	Other Possible Areas of Potential Risk	6-10
6.3	Recommendations	6-12
6.3.1	Drilling Operations	6-12
6.3.1.1	Maintenance of Mud Weight	6-13
6.3.1.2	Monitoring of Active Mud Tank Level	6-13
6.3.1.3	Monitoring of Hole Fill-up / return mud volume during tripping	6-13
6.3.1.4	Monitoring of Inflow	6-13
6.4	Disaster Management Plan	6-13
6.4.1	Scope	6-14
6.4.2	Disaster Management Plan: Key Elements	6-14
6.4.3	Basis of the Plan	6-14
6.4.4	Accident Prevention Procedures/ Measures	6-15
6.4.4.1	Operation and Maintenance	6-15
6.4.4.2	Emergency Management Interface	6-15
6.4.4.3	Incident Response Team (IRT) – Operational Response	6-15
6.4.4.4	Emergency Response Group (ERG) – Tactical Response	6-15

6.4.4.5	Emergency Reporting	6-15
6.4.5	Within the Field	6-16
6.4.6	Field to Emergency Control Centre	6-16
6.4.7	Incident Report	6-16
6.4.8	Incident Situation Report Form (SITREP)	6-16
6.4.9	Internal Distribution	6-17
6.4.10	Notification to Authorities	6-17
6.5	Emergency Response Strategies	6-17
6.5.1	Introduction	6-17
6.5.2	Declaration of Emergency	6-18
6.5.3	Emergency Alarm (Siren)	6-19
6.5.4	Preparation for Emergencies	6-19
6.5.4.1	Command by Competent Persons	6-19
6.5.4.2	Number of Persons for Emergency Duties	6-19
6.5.4.3	List of Persons for Emergency Duties	6-19
6.5.4.4	Control of Emergencies	6-19
6.5.4.5	Assembly Procedures	6-19
6.5.5	Post Emergency	6-20
6.6	Emergency Response Organization	6-20
6.6.1	Incident Response	6-20
6.6.2	Emergency Response Group	6-21
6.7	Emergency Response Action	6-21
6.7.1	Emergency Response Centers	6-21
6.7.1.1	Incident Control Centre (ICC)	6-21
6.7.1.2	Emergency Control Centre (ECC)	6-21
6.8	Accident / Emergency Response Procedures	6-22
6.8.1	Blowout	6-23
6.8.1.1	Person Discovering Blowout	6-23
6.8.2	Fire / Explosion (General)	6-23
6.9	Fire Prevention Planning and Measures	6-24
6.10	Communication	6-24
6.11	Emergency Control Centre	6-24
6.12	Recovery Procedure	6-25
6.13	Disaster Management Plan: Onsite Crisis	6-25
6.13.1	Role of Incident Controller	6-25
6.14	Disaster Management Plan: Offsite Crisis	6-26
6.15	Communication Systems Network	6-27
6.16	Role of External Services	6-28
6.16.1	Police	6-28
6.16.2	Fire Brigade	6-28
6.16.3	Hospitals and Doctors	6-28
6.17	Mutual Aid from Neighboring Installations	6-28
6.18	Public Information System	6-28
6.18.1	Before the Crisis	6-29
6.18.2	During the Crisis	6-29
6.18.3	After the Crisis	6-29
6.19	Fire Fighting System	6-29
6.19.1	Before the Crisis	6-29
6.19.2	During the Crisis	6-29

6.20	Relief to the Victims	6-29
6.21	Checklist for Capability Assessment	6-30
6.22	Warning System	6-31
6.23	Services Support System	6-31
Chapter 7.	Environmental Management Plan	
7.1	Purpose and Objectives of the Environmental Management Plan	7-1
7.1.1	HSE Policy of NAFTOGAZ	7-1
7.1.2	Organizational Structure and Responsibilities	7-2
7.1.3	Management Approach	7-2
7.1.4	Organizational Responsibilities	7-2
	7.1.4.1 Primary Responsibilities	7-2
	7.1.4.2 Field Management and Quality Control	7-3
	7.1.4.3 On-the-job Supervision and Monitoring	7-3
7.2	Mitigation Plan	7-3
7.3	Environmental Training	7-17
7.4	Waste Management Plan	7-18
7.5	Restoration and Rehabilitation	7-23
	7.5.1 Well Abandonment	7-23
	7.5.2 Well Suspension	7-24
Chapter 8.	Summary & Conclusion	8-1to8-2
Chapter 9.	EIA Team	
9.1	Company Profile	9-1
9.2	EIA work Team	9-2
Annexure I	Air Quality Monitoring Results	
Annexure II	Noise level Monitoring Data	
Annexure III	Event Analysis	

List of Tables

Tables	Pages
Table 1.1: Location and Geographical Information of the Block	1-4
Table 1.2: Applicable Acts and Guideline	1-4
Table 2.1 Key Block Information	2-1
Table 2.2: Generic Mud Program for the Wells	2-8
Table 2.3: Hole Section Wise Drilling Fluid Chemical Usage	2-9
Table 2.4: Outline Cement Program	2-10
Table 3.1: Ambient Air Quality Monitoring Stations	3-3
Table 3.2: Summary of SPM Levels Monitored in the Study Area	3-5
Table 3.3: Summary of RPM Levels Monitored in the Study Area	3-5
Table 3.4: Summary of SO ₂ Levels Monitored in the Study Area	3-5

Table 3.5: Summary of NO _x Levels in the Study Area	3-6
Table 3.6: Summary of HC in the Study Area	3-6
Table 3.7: Location of the Sampling Stations for Surface water	3-7
Table 3.8: Ground Water Sampling Stations	3-7
Table 3.9: Physical-Chemical Characteristics of Surface Water	3-8
Table 3.10: Physico-Chemical Characteristics of Ground Water	3-8
Table 3.11: Location of the Soil Sampling Stations	3-10
Table 3.12: Physico-Chemical Characteristics of Soil Samples	3-10
Table 3.13: Land Use Pattern of the Study Area	3-12
Table 3.14: Location of the Noise Monitoring Stations	3-14
Table 3.15: Summary of Ambient Noise Levels Monitored in the Study Area	3-15
Table 3.16: Tree Species Grown in the Study Area	3-16
Table 3.17: List of Pteridophytes Observed in the Block	3-17
Table 3.18: List of Mammals Observed in the Block	3-18
Table 3.19: List of Avifauna Observed in the Block	3-19
Table 3.20: Demographic Features of the Area	3-21
Table 3.21: Type of Household	3-21
Table 3.22: Literacy rate in the block area	3-21
Table 3.23: Occupational Structure of the District	3-22
Table 3.24: Amenities and Infrastructural facilities	3-22
Table 4.1: Interactions b/w Project Operations and Environmental Sensitivities	4-2
Table 4.2: Occupational and Human Exposure Levels	4-4
Table 4.3: Stack & Emissions Characteristic	4-6
Table 4.4 Predicted Maximum GLCs	4-6
Table 5.1: Recom. Environmental Monitoring Protocol – Pre Drilling Phase	5-1
Table 5.2: Recom. Environmental Monitoring Protocol - During Drilling Phase	5-3
Table 5.3: Recommended Environmental Monitoring Protocol - Post Drilling	5-6
Table 6.1: Blowout Frequencies by Phase of Operation	6-4
Table 6.2: Drilling Blowout Frequencies by Fluid Released	6-5
Table 6.3: Blowout Frequencies by Fluid in Well	6-5
Table 6.4: Contribution of Individual Operations to Blowout Frequencies	6-6
Table 6.5: Summary of Consequence Analysis for Jet Fire Scenario	6-7
Table 6.6: Testing Equipment Failure Frequencies	6-8
